What Sets Our Pediatric Medicine Unit Apart

In our fast-paced 40-bed Pediatric Medicine Unit, nurses and respiratory therapists primarily work with pediatric pulmonology, gastroenterology, nephrology and neurology patients. With a patient population that spans newborn to 18 years old, this unit is a great place to gain exposure to a wide variety of patients.

Quality improvement is an important focus. Nurse and physician teams work closely together on related initiatives and projects. Our efforts have been improving patient throughput times and discharge coordination amongst multidisciplinary teams. This unit is home to three nursing committees that meet regularly on nursing education, patient satisfaction and employee engagement and retention.

We are champions for new ideas and have piloted numerous programs that have all expanded hospital wide.

We value your education and growth as a nurse. Because of this, we provide annual education specific to our unit including current healthcare and respiratory trends, long-term ventilators and tracheotomy care.

Unique Care You Will Provide

- Respiratory: RSV, COVID, Cystic Fibrosis, Home Vent/Trach, Trachs, Asthma
